DETAILED ACTION

Allowable Subject Matter

Claims 1-2 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's admitted prior art (APA) teaches the following claimed citations as taught by Applicant's specification:

In reference to claim 1, Applicant's admitted prior art (APA) teaches the following claimed citations as taught by Applicant's specification:

least three independently accessible memory devices that can be independently tested (page 1, lines: 15-20), wherein at least one of the memory devices has a memory capacity differing from the other memory devices (page 2, lines: 15-23); a plurality of signal lines for providing each of the memory devices with an address signal and a selection signal, for activating the memory devices (page 1, lines: 28-35); and

In reference to claim 2, Applicant's admitted prior art teaches the semiconductor device according to claim wherein the predetermined memory device is the memory device excluding the one having a test period that is longest among the least three memory devices (page 2, lines: 23-31).

However, Applicant's admitted prior art fails to teach the additional limitation of claim 1:

“at least one inverter circuit each connected between a predetermined one of the memory devices and a predetermined one of the signal lines for providing the selection signal, wherein the inverter circuit inverts the selection signal.”

Kozaru ('066) teaches a similar method including an inverter to invert a test mode force indication signal but fails to teach to invert the selection signal as claimed by the Applicant.

Therefore prior art fails to teach in combination with the recited elements of claim 1, an “inverter circuit connected between a predetermined one of the memory devices and a predetermined one of the signal lines for providing the selection signal, wherein the inverter circuit inverts the selection signal” as recited by claim 1. Therefore claim 1 is allowable and claim 2 is also allowable since it acts to further narrow independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
